

FarmsKing E-Commerce Developer Execution Blueprint

ਡਿਵੈਲਪਰ ਤਕਨੀਕੀ ਬਲੂਪ੍ਰਿੰਟ ਅਤੇ ਡਾਟਾਬੇਸ ਸਕੀਮਾ

1. Core Architecture / ਆਰਕੀਟੈਕਚਰ

FarmsKing ਈ-ਕੋਮਰਸ ਮੋਡਿਊਲ ਵਿੱਚ ਹੇਠ ਲਿਖੇ ਮੁੱਖ ਘਟਕ ਸ਼ਾਮਲ ਹਨ:

- **Backend:** NestJS (Node.js) with Prisma ORM & PostgreSQL
- **Frontend:** React Native (Expo) for Mobile App & Web
- **Payment:** Cashfree Payments SDK + Split Payout APIs
- **Logistics:** Shiprocket REST API

2. Key Database Models (Prisma Schema Reference)

```
`prisma
model SellerStore {
  id String @id @default(uuid())
  businessName String
  gstin String @unique
  panNumber String
  bankAccountNo String
  ifscCode String
  isVerified Boolean @default(false)
  products Product[]
  payouts SellerPayout[]
  createdAt DateTime @default(now())
}
```

```
model Product {
```

```

id String @id @default(uuid())

storeId String

store SellerStore @relation(fields: [storeId], references: [id])

title String

price Float

discountPrice Float?

isFreeDelivery Boolean @default(false)

volumetricWeight Float?

stockQuantity Int @default(0)

}

```

```

model SellerPayout {

id String @id @default(uuid())

storeId String

store SellerStore @relation(fields: [storeId], references: [id])

grossAmount Float

platformFee Float // 10%

gstTcsAmount Float // 1%

shippingDeduction Float // 50% share if Free Delivery

netPayout Float

status String // PENDING, PAID, HELD

createdAt DateTime @default(now())

}

```

```

`

```

```

---
```

3. Implementation Step-by-Step Checklist

1. [] Extend Prisma Schema with `SellerStore` , `SellerPayout` , and `ShippingLog` models.
2. [] Integrate Cashfree Marketplace Vendor Creation & Split Order API.
3. [] Integrate Shiprocket Logistics API for multi-vendor pickup points.

4. [] Build CA Admin Dashboard to export CSV/Excel reports for GSTR-8 (1% TCS).
5. [] Build Seller Mobile UI in Expo React Native ((seller)/dashboard , (seller)/add-product).
6. [] Implement automated 50-50 free delivery calculation logic in order processing.
