

FarmsKing E-Commerce Developer Execution Blueprint

Technical Architecture, Database Schemas & API Specifications

1. Tech Stack Overview

- **Backend Framework:** NestJS (Node.js) with TypeScript
- **ORM & Database:** Prisma ORM with PostgreSQL
- **Frontend App:** Expo React Native (Cross-Platform Mobile & Web)
- **Payment Gateway:** Cashfree Marketplace Split Payout SDK
- **Logistics Integration:** Shippo REST API

2. Database Schema (Prisma Snippet)

```
`prisma
model SellerStore {
  id String @id @default(uuid())
  businessName String
  gstin String @unique
  panNumber String
  bankAccountNo String
  ifscCode String
  isVerified Boolean @default(false)
  products Product[]
  payouts SellerPayout[]
  createdAt DateTime @default(now())
}

model SellerPayout {
```

```
id String @id @default(uuid())

storeId String

store SellerStore @relation(fields: [storeId], references: [id])

grossAmount Float

platformFee Float // 10%

gstTcsAmount Float // 1%

shippingDeduction Float // 50% share if Free Delivery

netPayout Float

status String // PENDING, PAID, HELD

createdAt DateTime @default(now())

}
```
